## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 54, 55, 27, 60-63 and 66-70 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 54 includes "a continuous compressive force of less than 3mm Hg on an outer surface of the heart during diastole and systole." The applicant sets forth a range of "preferably less than 10mm Hg" and a compliance the same as the native pericardium (3-4 mmHg) but not a range limited to "a continuous compressive force of less than 3mm Hg on an outer surface of the heart during diastole and systole."
